

Calum Mathison

Software Developer

Software developer with a BSc in Game Development and a background in programming, software design, databases, and computing education. I bring strong problem-solving skills, clear technical communication, and experience turning complex ideas into practical software solutions. Now looking to contribute to clean, maintainable, user-focused development projects.

PROFESSIONAL EXPERIENCE

Computing Lecturer

2019-2022 & 2025-2026

Edinburgh College

- Delivered Software Engineering and Game Development teaching across programming, games design, databases, ethics, and development workflows.
- Designed and adapted practical learning materials, coding exercises, assessments, and project briefs to support learners at different ability levels.
- Taught core software-development concepts including object-oriented programming, problem-solving, debugging, version control, testing, and professional practice.
- Supported students through code review, technical feedback, one-to-one guidance, and assessment preparation.
- Helped learners develop employability skills through project planning, documentation, teamwork, presentations, and industry-style workflows.

Technical Designer

2022-2025

Build a Rocket Boy - shipped product: MindsEye (2025)

- Implemented gameplay systems, mission logic, and scripted interactions for MindsEye within a collaborative production environment.
- Worked closely with designers, programmers, artists, and QA to prototype, iterate, debug, and polish gameplay features.
- Translated design requirements into functional in-engine content, ensuring systems behaved consistently with gameplay and narrative goals.
- Created and maintained technical documentation to support implementation, testing, and cross-discipline communication.
- Investigated bugs, edge cases, and implementation issues, using feedback from playtesting and QA to improve feature reliability.

Previous Career - Chef

2009-2019

Multiple Locations, Across Multiple Countries

- Developed discipline, time management, leadership, and communication skills in high-pressure professional kitchen environments.
- Managed competing priorities, quality standards, and service deadlines as part of fast-paced production teams.

EDUCATION

Bachelor of Science in Game Development

Edinburgh Napier

2018-2021

HNC Game Development & NC6 Computing w/ Digital Media

Edinburgh College

2016-2018

SKILLS

- C#, C++, Java, Python, Lua, SQL
- OOP, Data Structures, Algorithms, Design Patterns
- Unreal Engine, Unity, MonoGame, .NET
- Gameplay Scripting, Technical Design, Procedural Generation
- Git, GitHub, Perforce, Version Control
- Debugging, Automated Testing, Documentation
- Agile, Cross-Discipline Collaboration
- HTML, CSS, JavaScript/TypeScript
